Subject: MS settlement

Hi'

i am a dual US Canadian citizen

I am highly concerned that the proposed MS settlement does NOT punish MS, infact it rewards them multifold basically a la steve jobs' statement

Furthermore, all this hassle publicity and etc has not stopped them in their march foward with the same business practices. In fact, things have gotten worse. See cringley's article on busting the software pirates.

I urge to to put some teeth into things for all of our long term benifit.

thanks for your consideration.
